Data notes

Psychological distress (synthetic prediction), 2007-08

High or very high levels of psychological distress, persons aged 18 years and over
Compiled by PHIDU using data estimated from the 2007-08 National Health Survey (NHS), ABS (unpublished); and ABS Estimated Resident Population, average of 30 June 2007 and 2008. The data have been derived from the Kessler Psychological Distress Scale-10 items (K-10), which is a scale of non-specific psychological distress based on 10 questions asked of respondents about negative emotional states in the 4 weeks prior to interview. 'High' and 'Very high' distress are the two highest levels of distress categories (of a total of four categories).
